Deploying the CUDA-Q Academic Launchable on Brev

1. Go to http://brev.nvidia.com and input your email to create an account.
2. Create a new Brev organization by clicking on the building icon in the top right corner and selecting: **+Create a new organization**

3. Go to the **Billing** tab
   i) **<u>If you have a coupon code:</u>**

      Scroll down and click **Redeem Code**.

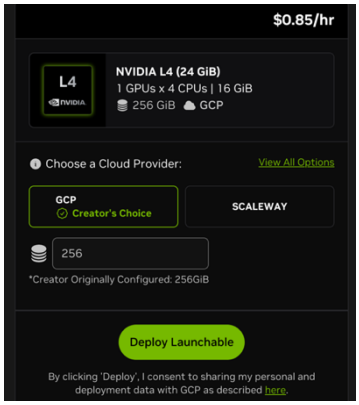
      Please ensure coupon code is all lower case.

      Click **Redeem**

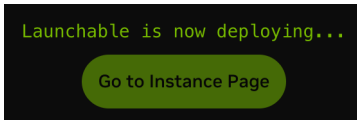
   ii) **<u>If you do NOT have a coupon code:</u>**

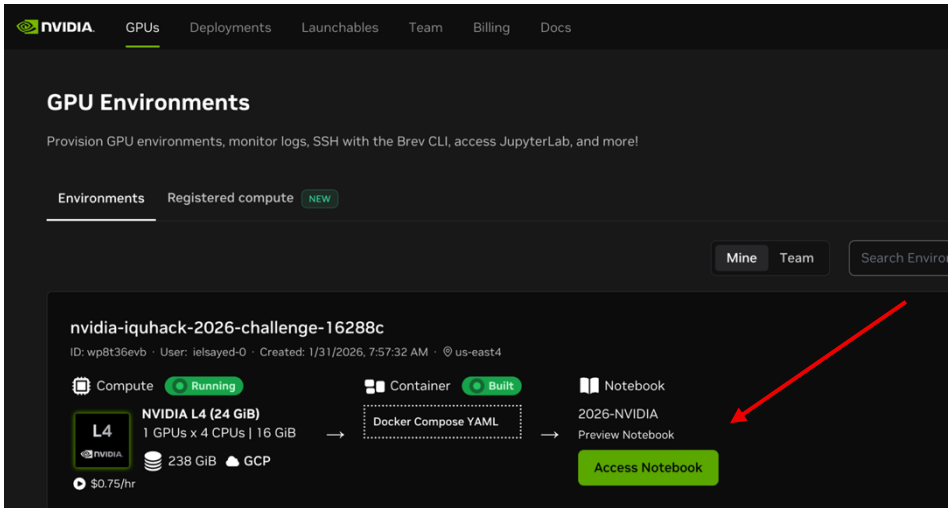
      Input card information

4. Click the Button or click here to access the materials in the repository in a pre-configured GPU-environment
   - If you don't want to use the recommended L4, select **View All Options** to change your GPU selection.



5. After selecting GPU configuration, click **Deploy Launchable**
   - You can check the status of your deployment by clicking **Go to Instance Page** or from the **GPUs** tab.





6. Once deployment is complete (~7 minutes), you will see a GPU environment under the **GPUs** tab with both stages green.
7. Select **Access Notebook** to pull up the environment and start running notebooks in CUDA-Q Academic!
